

List of Formulae

Logarithmic and Exponential Functions

$$a^x = b \Leftrightarrow x = \log_a b, \text{ where } a > 0, b > 0, a \neq 1$$

$$\log_b mn = \log_b m + \log_b n$$

$$\log_b \frac{m}{n} = \log_b m - \log_b n$$

$$\log_b m^n = n \log_b m$$

$$\log_b m = \frac{\log_c m}{\log_c b}$$

Compound Interest: $A = P \left(1 + \frac{r}{k} \right)^{kt}$ when interest compounds k times per year,

Compound continuous Interest: $A = Pe^{rt}$ when interest compounds continuously.
